TECHNICAL TOOLBOX

Front-End Development:

HTML5
CSS3
jQuery,
jQuery UI
HTTP Request/Response
Ajax

Languages:

Ruby,
Javascript
PHP

Databases:

SQL(MySQL, SQLite)
NoSQL (MongoDB)
Mongoose.js

Servers:

WEBrick,
Node.js,
Apache

Frameworks:

Ruby on Rails,
Express/Socket.io,
Angular,
CodeIgniter,
Twitter Bootstrap

Version Control:

Git,
Github

Libraries:

D3JS

Methodology:

OOP,
MVC,
RESTful Architecture
TDD,
RWD

FULL STACK WEB DEVELOPER

Passionate entrepreneur, making ideas into a reality through coding. Always looking for opportunities to develop new skills. Able to develop web application in 3 different stacks (LAMP, MEAN, and Ruby on Rails). A strong team player with a smart set of communication skills. Self-driven by eagerness to succeed and a strong willingness to always improve.

WORK EXPERIENCE

Dawon Inc.

2013-Present

Entrepreneur

Started our own e-commerce website that sold unique cell phone cases. Mainly focused on marketing side and analyzed who would be the right target to approach.

Talked to restaurant owners about the benefits of installing a P.O.S. system, then purchased and installed the hardware and software according to the customer's needs.

Mighty Solution

2013-2014

Marketing Manager

Designed marketing plans to achieve clients' goals and designed new strategies such as using SNS to market and managing clients' SNS accounts. After using blogs, YouTube, and Twitter to market, it brought in 30%~70% more views in clients' web-pages. Clients varied from Citi Bank to Electrolux.

WEB DEVELOPMENT PROJECTS

PriceCompare - Web app that allows users to search for a product they want and brings the results from different webpages such as Amazon, Bestbuy, Newegg, Walmart, and Target. Came up with the idea on creating a site and researched and found how we can make this app possible using Nokogiri gem that lets us scrape data from different pages. Also, did most of the front-end for the app. **Technologies Used: Ruby on Rails, WEBrick, Nokogiri, Twitter Bootstrap, HTML5, CSS3, Git, Github**

PokeCommerce - E-commerce website that sells Pokemon using LAMP stack. Started out with the idea of selling Pokémon to let users to battle each other. Mainly focused on the front-end side for this project as well as writing some algorithms. Implemented Stripe API to be able to process credit cards. **Technologies used: PHP, CodeIgniter, Apache, MySQL, Stripe API, Twitter Bootstrap, Git, Github, HTML5, CSS3**

Groupchat - Web app for real-time chat room with chat history storage. Able to communicate with other users instantaneously and tells who entered the chat. **Technologies Used: Javascript, Node.js, Express.js, Socket.io, MongoDB, Mongoose.js.**

EDUCATION

Coding Dojo, Seattle, WA

2015

BlackBelt- Web Development Program

Completed intensive web development program, working more than 1000 hours. Achieved highest rank of Blackbelt by passing 3 qualifying exams within 4 hours each.
